

# AI to LaTeX Document Generator

by Panos Kolyvakis  
panoskolyvakis@gmail.com

## Instructions and Features

### Search and Generate

- Initiate searches directly from the main interface.
- Automatic processing of top Google hits for content generation using Google's Custom Search engine.

### Document Creation

- GPT descriptions are compiled into a LaTeX template.
- Inspect the auto-generated PDF preview.

### Document Refinement

- Use *Refine Document* for custom edits.
- Implement changes via API for precision adjustments.

### Personalisation

- Personal details are added through *Add Details*.
- Ensure all relevant fields are completed for customization.

### Final Compilation

- Compile the final version for a polished PDF document.
